Vibrant Wheat Zoomer

Phlebotomy services available at an additional fee.

Combine the Vibrant Wellness Wheat Zoomer with the GUT-PAC for additional savings!

ZOOM IN TO KNOW IF WHEAT IS THE SOURCE OF YOUR PROBLEMS WITH THE WHEAT ZOOMER BLOOD TEST

- Do you still feel unwell even though your celiac blood test results were negative?
- Do you question whether or not you have a gluten or wheat sensitivity?
- Are you concerned you may have intestinal permeability?

WHEAT ZOOMER IS REALLY FIVE (5) TESTS IN ONE

This test is designed to distinguish between celiac disease, non-celiac gluten sensitivity, non-gluten wheat sensitivity, and other autoimmune diseases triggered by gluten. It also includes the market's most comprehensive biomarker panel to identify intestinal permeability (leaky gut syndrome). The Wheat Zoomer has been validated at 99% specificity and sensitivity.

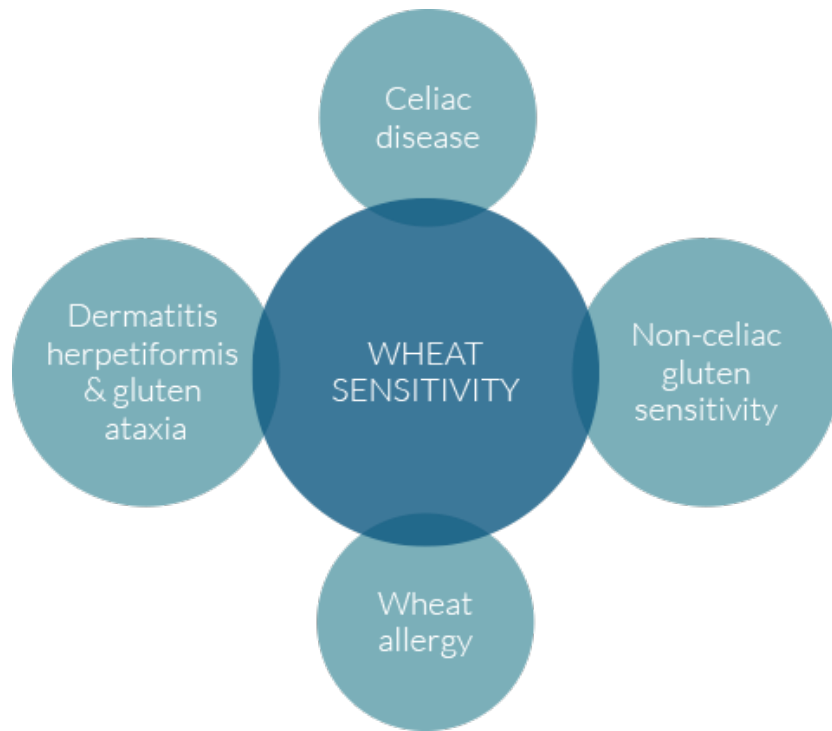

WHY IS VIBRANT'S TECHNOLOGY SMARTER?

Vibrant's microchip platform synthesizes entire wheat proteins, as peptides, and offers very specific antibody-to-antigen recognition. This results in a much more reliable diagnostic view with increased sensitivity and specificity.

Other labs measure certain peptides, which represent only partial snips of proteins. This offers a limited diagnostic view with much less sensitivity and specificity. **WHY NOT LOOK AT THE ENTIRE PICTURE INSTEAD OF JUST PART OF IT.**

Vibrant Wellness laboratory testing is done in a CLIA-certified, and CAP-accredited laboratory in California.

HELP SHORTEN YOUR JOURNEY TO WELLNESS

DID YOU KNOW?

- 1 out of 133 Americans suffer from celiac disease.
- 1 out of 60 Americans suffer from gluten sensitivity.
- 1 out of 7 Americans suffer from wheat-related disorder.
- Gluten is a general name for the proteins found in wheat, rye and barley.
- 20-30% of the proteins found in wheat are non-gluten.

WHAT IS WHEAT SENSITIVITY?

Wheat sensitivity involves an immune response by eliciting antibodies against one or more components of wheat when wheat is ingested. Wheat sensitivity can manifest as inflammation, which can occur in any tissue of the body. Gluten sensitivity is only a subset within a much larger group of wheat sensitivity conditions. The Vibrant Wheat Zoomer is designed to test and classify this larger cohort of wheat sensitive individuals.

SYMPTOMS AND CONDITIONS ASSOCIATED WITH WHEAT SENSITIVITY

- Digestive discomfort / IBS
- Low vitamin D levels
- Difficulty concentrating, or “brain fog”
- Low energy levels / fatigue
- Weight gain / weight loss
- Leaky gut syndrome
- Skin inflammation (eczema, dermatitis)
- Chronic headaches
- Joint pain, or numbness in the legs, arms or fingers

If you suffer from any of the above issues, but you remain undiagnosed, you may benefit from the Vibrant Wellness Wheat Zoomer test.

THE VIBRANT ADVANTAGE

In the past, wheat sensitivity has been very difficult to identify. Rest assured, the Vibrant Wellness Wheat Zoomer is designed to examine the most complex associations with wheat sensitivity known today:

✓ **By MINIMIZING FALSE NEGATIVES**

Test for reactivity to more wheat peptides than any other diagnostic tool available to date.

✓ **ENHANCED SPECIFICITY**

Comprehensive antibody recognition while simultaneously identifying any of the following conditions which may be associated with your symptoms:

- Leaky gut syndrome
- Celiac disease
- Wheat allergies
- Vitamin D deficiencies
- Gluten ataxia (neurological)
- Dermatitis / eczema (skin)

✓ **UNDERSTAND THE SOURCE/TRIGGERS**

Comprehensive test interpretations are available to help you understand the source of your symptoms and implement a personalized and effective wellness plan.

✓ **MORE ACCURATE TEST RESULTS**

Highly accurate and quantifiable test results are backed by the most advanced diagnostic screening platform available.

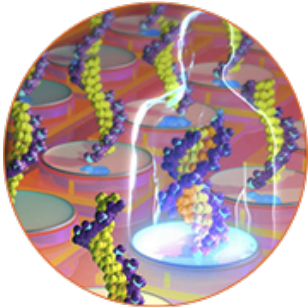

VIBRANT WHEAT ZOOMER INCLUDES:

- All known deamidated gliadins
- Alpha-Beta, gamma, and omega gliadin
- HMW and LMW glutenin family
- Tri A37, wheat allergen
- Differential transglutaminase 2, 3 and 6
- Zonulin protein and actin
- Somatostatin
- Wheat germ agglutinin (WGA)
- Non-gluten wheat proteins
 - Farinins
 - Serpins
 - Peroxiredoxin
 - Globulins

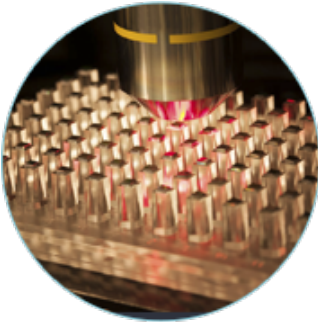

WHAT HAPPENS IN THE LAB?

1. YOUR BLOOD SAMPLE IS COLLECTED AT A LOCATION NEAR YOU.

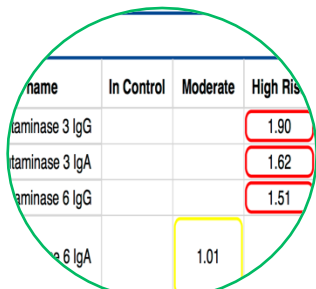

2. WHEN YOUR SAMPLE ARRIVES AT VIBRANT WELLNESS LAB, IT IS ANALYZED WITH THE WHEAT ZOOMER CHIP.

3. IF YOU ARE SENSITIVE TO WHEAT, YOU WILL REACT SPECIFICALLY TO ONE OR MORE OF THE WHEAT PROTEINS TESTED.

4. YOUR REPORT IS THEN ANALYZED USING A PROPRIETARY ALGORITHM TO DETERMINE THE LEVEL OF YOUR RESPONSE.

| name | In Control | Moderate | High Risk |
|----------------|------------|----------|-----------|
| glutenin 3 IgG | | | 1.90 |
| glutenin 3 IgA | | | 1.62 |
| gliadin 6 IgG | | | 1.51 |
| gliadin 6 IgA | | 1.01 | |

5. ONCE WE RECEIVE YOUR TEST RESULTS FROM THE LAB, YOUR RESULTS WILL BE UPLOADED TO OUR HIPAA COMPLIANT WELLNESS PORTAL.
